DETAILED ACTION

REASONS FOR ALLOWANCE

1. After further search and thorough examination of the present application claims 1-7 are found to be in condition for allowance over the prior art of record.

The following is an Examiner's statement of reasons for allowance: the claimed invention relates to a plasma display apparatus which has an improved data converter and which can display a higher quality image.

The first cited reference, Otawara (U.S. Pat. No. JP 11146306 A) discloses a PDP display for increasing the gray scale level for a dark video image on a PDP. The second cited reference, Tajima et al. (U.S. Pat. No. 5,818,419) disclose a display device and method for driving the display device.

None of the cited references either singular or in combination discloses "a data converter to convert input video data into output data of each pixel into output data in which the ON/OFF states of the sub-frames are specified; wherein a number of gray scale levels of the output data is greater than a number of gray scale levels of the input video data, and the sub-frames include a small luminance sub-frame having a luminance level which is lower than the minimum gray scale level of luminance which can be represented by the number of bits of the input video data".

These limitations, in conjunction with all other limitations of the base claims were not shown by, would not have been obvious over, would have been fairly suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
